FIFA 22 features an immersive, next-generation interactive gameplay experience that uses 3D motion capture data to bring gamers into the action. This makes the experience feel more interactive as it allows gamers to choose their defensive team tactics, location, and feel real player reactions to the action. Now, everyone can enjoy the ultimate player experience that takes place right on their TV screen. Gamer Profile and Stat Collection The most authentic method for game developers to learn about player habits is via their personal data. Today's experts only look at a player's stats, but only when they're using a given game. With FIFA 22, Live Gamer Profile replaces Live Champions League Player Profiles. This has been done to make the match engine more personalised and offer greater variations in player personalities. Simplicity is the key in this latest iteration of this platform, since it emphasises the presentation of data, not functionality. Live Gamer Profile is a useful tool that allows you to see your player's stats, trophies and technical data on any given game. Live Gamer Profile allows you to create personalised game engines that include your stats, trophies and more. Development of new player profiles, new card and variety-based skill trees, and AI enhancements, including combat, will enhance the playability of FIFA 22. New Card Skins and Card Improvements FIFA 22 will feature more than 1,000 different cards in all competitions. The user will also be able to create his or her own personalised cards using the Live Gamer Profile. FIFA 22 introduces new card skins, and the cards will look similar to the way they do in real life. For example, Gabriel Jesus wears a red shirt in real life. However, Gabriel Jesus' card will look different as he wears a red shirt. Players' individual characteristics, including their hair colour, will be shown in the back of the card, further highlighting the individuality of the players. Until now, it was difficult to see the details on the FIFA 22 cards for a given player. For example, it was difficult to see the details on the stars and stripes on the card. Now, you'll be able to see the details on the cards of the players. Fans can also manipulate the cards, as they'll be able to change the number of coins available to a player on a given day. FIFA 22 introduces a wide variety of card improvements
