FIFA is the definitive football experience on consoles. EA SPORTS FIFA 18 The Master Arena on PlayStation4, Xbox One, PC, Mac and Linux. EA SPORTS FIFA 19 Goalkeeper AI has also been improved. The impact of the FIFA World Cup™ and the FIFA 19 gameplay update have been realised, allowing teams to really take advantage of the new attacking styles of football when playing the game in 'The Master Arena.' "We know we have our fans and die hard football fans out there, so they expect the best. And when we say best, we mean best," said EA SPORTS FIFA 19 Producer, Fatih Üstün. "In FIFA 19 we focused on player development for the best football experience, and that also includes the goalkeepers, who now have improved reactions to save shots and can make better decisions. This is just one example of how we have taken player development into account, from the goalkeeper on up to the defenders and midfielders." The Changes to Goalkeeper AI have been Implemented To enhance the realistic behaviour of the game's goalkeepers, we have made changes to goalkeeper behaviour, which should assist you in handling situations that you might have previously experienced as issues. Player Development: Player Defending has been rewritten We have rewritten the player defending system, and in doing so have improved the defending AI system. Players will now approach the ball more intelligently and react more quickly and accurately. Individual Defending: Players now defend better within the team Individual defending is one of the many new elements of FIFA 19 that we have been working on. Now when you're defending a player running towards the ball you will determine their most probable destination and pursue that choice. Every player is learning to master their new system of defending. While there is still a lot to be done, we're happy with the direction we've taken the players' defensive game. We've been working closely with our development team and Goalkeeper coaches to make sure goalkeeper defenders behave in an intelligent fashion as they make decisions on a player's movements towards the ball. At times, defenders may even defend beyond the attacker as they follow their player's path towards the ball. Goalkeeper Technique: Players learn to correct their dives When you dive, you will not get back up as quickly as before. Your player will need to bc9d6d6daa
