Our team of experts can be accessed any time any day of the year for your help and support.Q: iOS 7 font styling issue I'm trying to make our iOS app compatible with iOS 7, which involves making all fonts bold and making the text of all views dark. So I changed the following in appdelegate.m UIFont *font = [UIFont systemFontOfSize:16 weight:UIFontWeightBold]; [[UITextField appearance] setFont:font]; [[UITextView appearance] setTextColor:[UIColor colorWithRed:102.0/255.0 green:102.0/255.0 blue:102.0/255.0 alpha:1.0]]; But the issue is after upgrading to iOS 7, text appears light even though I'm setting the font to be bold. The issue is, when I set font in my class, the UITextField's appearance already is set to bold. Is there any way to make the text light? A: You're setting the entire application's text appearance. In iOS 7, the text appearance of UITextViews has been made to use the application's base text style. Instead, set the text style of each text field to UIFontTextStyleBody, which is the body style: [[UITextField appearance] setFont:[UIFont systemFontOfSize:16 weight:UIFontWeightBold]]; [[UITextField appearance] setTextStyle:UITextStyleBody]; Similarly, change the text style of your text view to the following: [[UITextView appearance] setTextColor:[UIColor colorWithRed:102.0/255.0 green:102.0/255.0 blue:102.0/255.0 alpha:1.0]]; [[UITextView appearance] setTextStyle:UITextStyleBody]; A: If you do not want to change UITextView appearance and your style is set to U

Win Firewall Log Analyser Crack+

Win Firewall Log Analyser is a software solution whose main purpose is to aid people in analyzing and reading Windows Firewall logs, so that you can find the source of malware with ease and protect your computer from future issues. Clear-cut interface The setup process is over in a jiffy, while the interface is very well-organized and clean, as it only comprises a menu bar and several panes in which to display various data. Although Help contents are not included, you can still find your way around Win Firewall Log Analyser, regardless of the experience you have with computers. Select log and filter data This utility can automatically detect your firewall log file, yet you can also manually upload it with the help of the built-in file browser. Aside from that, you should know it is possible to filter the information, by excluding particular protocols (TCP, UDP, ICMP), packet paths (send, receive, forward), actions and common noise. View results and tweak parameters You can also select which services and protocols to consider during your scan, see some suggestions and finally view results in the main window. The most active ports, protocols, source IPs and conversations are going to be displayed as lists, as well as pie charts, so that you can better understand the values returned. It is possible to change your settings at any point with just a few clicks, as well as analyze the entire data again. Multiple keyboard shortcuts are provided for most of the actions enclosed, yet they cannot be customized. Conclusion The system's performance is not going to be hampered as it does not require large amounts of CPU and memory. The response time is good, the interface is accessible to both power and novice users, and the data provided is quite useful. Taking all of this into consideration, it is safe to say that Win Firewall Log Analyser is a pretty efficient piece of software for those interested in analyzing and viewing stats from their firewall. We did not come across any hangs or freezes in our tests. #1 WOT (Web of Trust) - Website reputation, Check WOT reputation for any website, identify scams and unsafe links on the web. #2 JMICRON (Web Index File) - Identify and index your website or blog with the fastest fastest web crawler in the world. #3 W3C HTML validator - Validate HTML, CSS, JavaScript, XHTML or HTML5. #1 WOT (b7e8fdf5c8

Win Firewall Log Analyser

Windows Firewall Log Analyser helps you to analyze and examine Windows Firewall log, keeping you informed about what firewall and antivirus protection services enabled on your PC. It provides data about all inbound and outbound firewall connections for Windows servers and laptops, including the source and destination IP addresses, timestamp, and protocol type, among others. You can see data of a selected session in an easy-to-read and easy-to-understand format with the help of filter conditions. Win Firewall Log Analyser comes with basic functions for analyzing network logs and is designed to be intuitive and easy-to-use with intuitive and nice graphical interface. The logging data format is Windows NT, Windows 2000 and Windows XP compatible. Win Firewall Log Analyser Screenshots: Win Firewall Log Analyser Reviews: Would not work Written by: Judith Posted on: 12/20/2016 I am sorry to say but this software did not work for me. I installed it and it would not detect the log file in the folder. I have windows firewall and advanced firewall and this is the log file of the Firewall. I tried both firewall programs and it did not work. Sorry to be the one to report it.L'État du Connecticut vient d'obliger un forgeron de Boston à se découvrir le visage. Il avait été placé en garde à vue pour avoir fabriqué un emballage de santé des institutions de santé pendant la crise de la pandémie. L'homme avait servi jusqu'au 6 juin dernier en tant que chef d'atelier et avait été licencié, mais il n'en a pas accepté le démarrage. «Vous voulez tout savoir, ajoutent les médias locaux. Une plainte a été déposée contre lui pour avoir fait fabriquer les emballages de santé durant la crise de la pandémie et le découvert. Les résultats de la deuxième série de tests pour la COVID-19 réalisés au Connecticut sont positifs». «Le forgeron exposé a ét
