 "The trial version of the SmartScan Plus Software is suitable for anyone who is interested in scanning documents or printed photos to e-mail them as attachments. As a result, you'll be able to convert your own images into the standard Microsoft Picture formats (JPG, BMP, and TIFF). By comparing the difference between the original images and the converted images, you can easily choose between the best matches. The program's solution is intended for both individuals and businesses; in other words, it's suitable for everyone who needs to convert images and mail them. The tool has two scanning modes: single and batch. If you need to convert more than one document at a time, then you can choose the batch mode. In that case, the program will automatically detect the number of documents and wait until you close the main window. And in case you want to convert a group of documents into a larger format, you can use the smart shift option to quickly get the best results. This feature is called "smart shift" and you can adjust the scanning speed, the speed of color reproduction, the shift resolution, and the crop factor. One of the program's highlights is a digital preview. This option allows you to compare the original and

**What's New in the?**

\* Corrects vignetting-related issues like "Cyan Corners" or "Red Corners"
 \* Adjusts the Luminance and the Chroma filter for lens profiles correction
 \* Adjusts the Anti-aliasing option for the current image
 \* Adds up to 20% of lossy compression for the current image
 \* Can be used to process multiple DNG files at the same time
 CornerFix uses the RAW format and comes packed with options for working with jpeg images as well. CornerFix is a lightweight Windows application developed to help you enhance your photo quality (DNG file format) by correcting the "Cyan corners" problem usually caused by color vignetting issues that may appear while taking photos with Leica M8 digital cameras using IR filters. The tool was originally developed for the Leica M8 cameras but it offers support for any DNG files. Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to apply some photo correction operations on the breeze, without having to go through installation steps. Clean lineup of functions It sports a clean and intuitive layout that allows you to carry out most operations with minimum effort. Plus, it offers support for a dual panel, where you can analyze the original and edited image. The program gives you the possibility to upload files into the working environment using the built-in browse function, so you cannot rely on "drag and drop" operations. Filter corrections and batch processing Basically, CornerFix makes the correction process seem nothing but a piece of cake, as it automatically analyzes the vignetting-related issues, such as "Cyan Corners" or "Red Corners," and creates a lens profile. It is important to mention that the utility applies the corrections to the raw data level, so you can still process the photo with dedicated tools, such as Lightroom. The app lets you manually adjust the luminance and chroma filters, use lens profiles for correcting the current image, apply anti-aliasing options, as well as compress the items. CornerFix offers support for batch processing, which means you can add multiple DNG items and process them at the same time.
 Conclusion All in all, CornerFix offers a handy set
