computer users
track, manage and
organize meal

vouchers for students in a quick and effortless manner by providing them with an all-in one utility. The application comes with a user-friendly interface that encompasses various intuitive functions, making it highly suitable for a wide range of computer users, from novices to professionals alike, regardless of

overall PC operating skills or previous experience with similar programs. In order to generate meal vouchers, users have to select the printed days from the first category, choose a student to print the vouchers for, customize various page settings from the appropriate tab and customize other aspects such

as the fonts for the institute, day, name and month as well as the distances between these parameters. The page settings let you select templates from a preset menu, customize the top and left margin values by typing your desired parameters in the designated fields, set the count pages number, enable or disable landscape

mode and more. Meal Vouchers can be installed on the target computer without significant efforts. All you have to do in order to deploy is launch the installer and follow the on-screen instructions.
