Mechanics 24, 1957,
361-364.Q: Modify

Javascript String with
RegExp I need modify
date in my javascript
code. I have regexp: `var
regexp = /\s+tot([u|w]?ye
ars\b)+(\s|\.)+\s+/g` My
data is like this: `var text
= "tot da years";` and my
text should be modified
like this: `var text = "tot
danyears";` Anyone can
help me? Thanks, A: Just
match and replace the
string: `var re = /\s+tot([u|`

```
w]?years\b)+(\s|\.)+\s+;/;
var text = "tot da years";
if (text.match(re)) { text
  = text.replace(re, "tot
  danyears"); } To use a
  different base, use
  backreferences with the
  $: var re = /\s+tot([u|w]?y
  ears\b)+(\s|\.)+\s+/g; var
  text = "tot da years"; if
  (text.match(re)) { text =
    text.replace(re,
"$1danyears"); } A: If you
  are using Node (or
```

```
Node.js) you can do: var
str = 'tot da years'; str =
  str.replace(/tot da
years/g, 'tot danyears');
//str === 'tot danyears' }
catch { return null; } }

Analysis of stresses and strains near the end of a crack traversing a
Plate. Journal of Applied. (1994) "Stress Intensity Factors for Singular
Strains Near the End of a Crack in an Infinite Plate." Int. Analysis of
stresses and strains near the end of a crack traversing a plate. Crime
prevention: a model of program evaluation. A model for evaluating
crime prevention programs is described. Crime prevention is a
challenge that involves 4 components: (1) describing the problem and
its magnitude; (2) formulating a theory of crime causation; (3) testing
assumptions of the theory on which the theory rests; and (4)
developing and testing a program. Variables which define the theory
and predictors of crime-prevention intervention are identified. These
variables are tested in a field experiment to test the predictions of the
theory, and the feasibility of a program is assessed. Q: Can't resume
after suspend - Linux My wife's pc: Laptop Dell Vostro 2560 Intel®
Core™ i7-6500U CPU @ 2.80GHz × 4 16GB RAM Ubuntu 20.04 It
doesn't resume from suspend. When plugging the charger or the

HDMI display it says that it can't resume. Powertop shows that it consumes about 800mA, it's a dual-core processor. Nothing suspicious in the dmesg: [0.000000] Linux version 5.3.0-28-generic (buildd@lgw01-amd64-026) (gcc version 7.3.1 (Ubuntu/Linaro 7.3.1-11ubuntu1)) #36~20.04-Ubuntu SMP Tue Apr 27 19:56:15 UTC 2020 (Ubuntu 5.3.0-28.37~20.04.1-generic 5.3.28-26~20.04)
