the Invention The present invention  
relates to a liquid crystal panel  
including a reflective-type liquid  
crystal panel, and an image display  
device including the liquid crystal  
panel. 2. Description of the Related  
Art A liquid crystal panel including a  
reflective-type liquid crystal display  
and an illumination device are used  
for an image display device, for  
example. A liquid crystal display  
includes a liquid crystal panel and an  
illumination device. The liquid crystal  
panel includes a liquid crystal layer  
between a pair of substrates, and a  
light-transmitting electrode and a

reflective electrode are provided on the respective substrates. In the liquid crystal display, the illumination device illuminates the liquid crystal panel by using light from the illumination device and displays an image on the liquid crystal panel. In a direct-view type liquid crystal display, a backlight is provided at a rear surface of the liquid crystal panel to illuminate the liquid crystal panel. The liquid crystal panel includes, for example, the transparent-type liquid crystal panel that displays an image using the transmittance of light passing through the liquid crystal layer of the liquid crystal panel, and the reflective-type liquid crystal panel that displays an image using light
