Working with Groups The concept of a group is similar to working with layers. Grouping objects allows you to make a single layer with different parts that are modified independently of one another. The concept of groups is similar to layers. Whereas layers change the visible parts of your image, groups change only the appearance of a specific object. You work with groups from the Layers panel, as shown in Figure 4-1. The Options bar at the top of the screen enables you to customize settings that govern the elements in your image, such as the order in which they appear on the screen. As with layers, groups provide a visual reference to the selected element. In Figure 4-1, layers 1 and

Shah told reporters in Dehradun that the Congress-AAP alliance was a "response" to the "opinion" on the tie-up. The ally Congress replied immediately that the AAP was dragging it into a "conversation on alliance" after reaching out to it for talks a few weeks ago."The Congress has accepted a proposal for talks, and therefore it is up to the two parties to enter into talks or not," Congress leader Ajay Maken told NDTV. "This should not be used to drag the alliance into some other thing which is not related to any alliance, and I am not going to get into it." The party kept quiet on the matter earlier in the day. But late in the evening Maken told the media: "We met the AAP leaders to tell them that we will not get into alliance talks with them but only if they discontinue their alliance. They answered that they will talk only to the Congress. How can we have talks with them?" AAP leader Yogendra Yadav wrote on Twitter, "Shah made the statement in Dehradun that alliance with Congress will be reviewed after talks with AAP. Has he not realized that the BJP is attacking AAP because AAP rejects BJP-Congress tie-up? " The BJP's obvious desperation also caught the Congress off guard. The party's reply was muted. "BJP must go to Congress to see whether we can sit together. Both will have to have a fair meeting, but we can't allow that a leader of the Congress is at the PM's level and his son is the leader of another party," said Maken. The BJP was clearly rattled and flummoxed by the

The Eraser is a brush tool that allows you to erase parts of your images by painting over them. The Lasso tool is very useful for selecting a part of an image for modifying it. A Smudge tool can be used to quickly modify images using the background. The Pattern tool lets you draw patterns and images on images. The Gradient tool can be used to create fills, borders and shades. The Pen Tool is useful for creating precise vector shapes. The Shape tool lets you create custom shapes. The Content Aware Paint tool makes your selection faster by using the subject matter of the image. Smart Filters can be used to filter an image and have the filter modify the image based on the image. The Magic Wand tool can be used to find areas of an image that match a certain color or pattern. There is a kind of tool called the Magic Wand in Photoshop. It is used to quickly select an area of pixels based on their color, size, or shape. The Magic Wand tool can be used to select a color in any given image that will apply to each pixel in that image. You can use it to make changes to your images by setting a color and then sweeping over the area in which you want to make modifications. The Gradient tool is used to place a gradient in an image. To create a gradient, type in the name of your color in the Gradient Picker Tool window, which is on the left side of the screen. Color Pickers are used to add color to different areas of an image. They can be used to color in a selection or can be used to find color harmony. There are two sorts of paint tools, which are the type and which brush. The type is used to fill an empty spot, brush to paint over a spot and lines to create borders. Layers are used to separate elements in a document, move them around, and make changes to a document. The main difference between layers and groups is that you can only have a single layer in a group while you can have many layers in a group. You can use the rulers to properly arrange a document. The File Open dialog box allows you to open a file in Photoshop. The Type tool is used to create fonts. It can convert text into a font or allow you to create a new font. The Type tool is used to create fonts and can either be used to convert text into a font or to create a new font. The
