custom offset low-profile sprocket, and a unique rear tire ratio. These features offer enhanced traction and stability in the corners, and the monostrut air scoop and extended center of gravity accommodates the stock oil fill and fuel tank to allow for enhanced stability on winding courses. The custom model additionally boasts improved ground clearance, allowing the driver to maneuver through shallow ruts and off-road obstacles. It also features custom front and rear coil springs for a more comfortable ride and suspension, with an additional coil spring on the driver side to provide additional compliance and clearance in the dash and under the seat to accommodate taller driver heights. 2019 Symmetry Brands The custom model builds consist of a synthetic bucket-track, a custom monostrut air scoop, a 20.0-inch (25mm) custom offset low-profile sprocket, and a unique rear tire ratio.
