Intraoperative TEE is a well-established imaging tool for the evaluation of critically ill patients. In recent years intraoperative TEE has been increasingly employed for guiding and controlling surgery. The importance of perioperative TEE for the assessment of the valvular, ventricular, and the atrial heart structures is emphasized. It is vital to correctly detect the morphology and the function of both the leaflets and the atria in order to adequately evaluate the valve to minimize the risk of postoperative re-interventions. The safety of TEE has been established in adult, paediatric and congenital heart operations. Careful anatomical, functional and device related TEE assessment can be carried out under extracorporeal circulation and pulmonary hypoplasia. In this review the use of intraoperative TEE in congenital heart surgery is discussed in detail with special emphasis on routine assessment of valves, atrial function and valvular correction.2021 National League Championship Series The 2021 National League Championship Series (NLCS) will be a best-of-seven playoff series to determine the champion of the National League. The series will be played in the fall of 2021. Qualified teams In the event of a tie, teams will be seeded based on their winning percentage. Tiebreaker procedures If a series between two teams remains tied 2-2 after the first three games, and if there is a tie (and again, if two teams remain tied) in the head-to-head game, then the total number of wins by the team in the head-to-head series will determine the team that wins the tiebreaker. If the two teams have an identical record, then the number of head-to-head games won by the team with the most wins in the series will determine the winning team. If the teams have the same number of

Ischaemic diseases such as myocardial infarction and stroke arise from coronary and cerebral artery occlusion. Cell therapy has proven to be effective in improving the quality of life after ischaemic diseases. Mesenchymal stem cells (MSCs) have been widely studied as potential candidates for cell therapy. However, their therapeutic effects were often accompanied by
