Creating a Vector Image (Saving Vector Files) **1.** You can choose any type of logo or illustration for the client you're working on. The drawing may be simple or complex, but it needs to be scalable because you will need to incorporate it into various sizes of business cards, postcards, brochures, and flyers. **2.** On the Home tab's Customize subtab, click the heading above the Layers panel to open the Layers panel. This panel lists all the layers in your document. **3.** Click the background layer that contains your image to select it. **4.** Click the Image Trace button on the Tools panel or press CTRL+T (Windows) or CMD+T (Mac) to open the Trace section of the Options bar and select Vector Trace from the drop-down menu. This process makes the image into a vector file. You can still modify the image's colors, but you can't change the image's resolution or alter the shape with the Pen tool because vector files don't have pixel resolution. **5.** Return to the Layers panel. Open the Layer Style menu and click the Stroke Color button (if the Layer Styles dialog box appears, click the green OK button to exit the dialog box) or click the Stroke Color icon (red circle with a green arrow pointing toward the bottom-right corner of the dialog box) on the Stroke Color menu, as shown in the figure below. This brings up the Color panel,

Adobe Photoshop vs Photoshop Elements There are a few different versions of Photoshop, but one of them, called the original Photoshop, is what we're going to cover in this article. Photoshop Elements Photoshop Elements, originally Photoshop Lightroom, is the free version of Photoshop for professional photographers. Many of the features in Lightroom make their way to the Photoshop Elements "cropped" version. The most obvious of these is the Lightroom-like mode, for example the Content-Aware feature. However, there are also less obvious features. These are things that you wouldn't really think would make the jump from Lightroom to Photoshop. But the case for Elements is strong. Here's a list of some of the areas where Photoshop Elements beats Photoshop: Ease of use Elements is way more intuitive than the professional version. Not only can you use it with just one hand, but some of the tools work differently to make your job easier. For example, the Basic Edit Tool is a brush-like tool, so using an eraser is just as simple as using a brush. You can also use the eraser tool with the Magic Wand – you just click once anywhere to select the whole area, and click again to click the areas that you want to erase. Elements also includes a "color-removal" tool that works in the same way as the Magic Wand. It has a range of options, including the usual on/off switch, and you can change the "weighting" of the colour using a slider. Elements also includes the ability to view thumbnails of your files in "panoramic" mode, so you can see the whole image at once. Speed Elements can be very quick and responsive, even when you have a big image. Unlike Photoshop, Elements doesn't load the whole image into the software every time it runs a tool. This speed is especially good when you're working on small images. Size Elements uses a lot less memory, and is a lot smaller than Photoshop. However, it only includes the tools that you need, so if you've got Photoshop installed on the computer you'll have everything you need, so it really is a matter of the tools you want to use. Days of Darkness Letting Go Men do not generally understand women. They do not know how they can learn and develop themselves. They do not understand why we should even bother to get to know them. Men don't know why we are so frustrated by the fact that they cannot learn our languages and the fact that they think they can monopolize so much of our time and labor simply because they are men. Women do not understand men. They do not understand their hopes, their wishes, their fears, or their hopes for the future. They refuse to learn the language of their husbands or to seek help from him when they need to. They are convinced that they are not in a relationship at all. They do not realize that they give so much and expect so little, when they expect the man to be responsible for the household, for their children, for all the chores, for the house and for the outside world. We are the real prisoners in this society. We are not truly free to spend our own time. We are not free to work outside the home, to have a relationship with another person, or to be left alone. We live in a society where a woman married to a man does not exist; or, if she does, she is considered to be totally incompetent and irresponsible. We are used to being released from the responsibilities of our own lives. We have been trained to do without. We have accepted the fact that we are not required to have the freedom of the mind or the opportunities for the growth of our characters. We are told that we must be responsible for the home and the children and for the household. We expect so much of ourselves, and of our husbands, that when our demands are not met or when we have any sort of difficulty we blame the man, not the system. We look for the flowers to bloom, not for the weeds to grow. We see ourselves as flowers, not weeds. The true reason the flowers should bloom is that they have been fertilized by the sun and the rain, not that they have been overlooked and carelessly cared for by their owner.The owner of Sydney's inner west florist AJ's Deli and a nearby business have been forced to close their doors after an arsonist torched their premises overnight. Firefighters were called to the corner of the Star City shopping strip in Chippendale about 1:00am after a fire broke out at the 'doughnut' florist. Police are investigating after a
