Adobe's website offers tutorials at . Photoshop can be used to create your own images, but it can also be used to create web graphics and other types of images. Working with Photoshop You start with a new, empty document in Photoshop by using the New button. The canvas fills the screen by default, so you have to zoom out to see the entire canvas. At the top of the screen, you find buttons that let you zoom in and zoom out. You can use all the buttons on the tools bar as needed. The easiest place to start is on the toolbar by clicking the New button. You'll find all your most commonly used tools in the Top Bar (see Figure 6-1) of your workspace. (The Lower Bar is discussed in Chapter 3.) Figure 6-1: Click on buttons on the Top Bar to zoom in and out and to move or resize the image. You can move the image around on the screen (using the Move tool) by clicking and dragging the image or by pressing the space bar. You can also scale the image by dragging the middle of the image to move the image up, down, or side to side. The point size of the image controls the size of the image. You can change it in Photoshop by using the Size menu (it's in the Size group on the Tools panel). When you zoom in, the image gets larger; when you zoom out, the image gets smaller. You can create a new document from the New Layer dialog box in Photoshop. Follow these steps to create a new document: 1. Click the New Layer button on the Layer panel (it looks like the New Layer icon) in the Layers group on the panel to open the New Layer dialog box. 2. In the New Layer dialog box, click the Source button on the left. The Source List window appears, and it lets you choose from several types of layers. 3. Select the Create New Smart Object option to create a layer that's smart — that is, it maintains the size and dimensions of the original file. 4. Click OK. 5. When you open the Layers panel, you see a new item representing the layer you just created. If you already have layers in a document, you'll see

Former host for the Republic of Ireland, Turlough O'Connell, died in a UK hospital in December. He was 89 and is alleged to have been a leader of the Republican movement in the 1950's. He was offered a knighthood by the British government but refused to accept it. The orator and Irish revolutionary was President of Sinn Féin, the Irish republican party's political wing, in the 1990's. He was speaking at a children's party in the British parliament in December when he collapsed. He had just finished a speech in the House of Lords before being taken to hospital in London. A spokesman for Sinn Féin said they would be appealing to the British government to investigate whether his death was a political assassination. Turlough O'Connell died a week before the 100th anniversary of the 1916 uprising in Dublin. BBC links

One-pot synthesis of 1,4-naphthoquinone mesylates in aqueous media. Mesylated 1,4-naphthoquinone derivatives have been synthesized through an aqueous medium in one-pot reactions by simply adding one equivalent of mesyl chloride to a solution of 1,4-naphthoquinone in water. The reaction takes place in a time-dependent manner, monitored by UV-visible spectroscopy. The use of an aqueous medium to achieve the synthesis of 1,4-naphthoquinone mesylates is not only convenient from an industrial point of view, but also very environmentally friendly.
