Configure all settings during installation Right from the start, you can make the whole configuration during setup. If your computer is running multiple OSes, it's important to mention this and decide whether you want to install the application on all operating systems or just the current one. Next, you can set an administrator password to prevent unauthorized access, select the drives you wish to protect, as well as create an exclusion drive in order to keep the new or changed files and apps in that specific partition while performing rollback. Computer restart is necessary to finalize setup. To manage snapshots and uninstall this tool, press the Home button while Reboot Restore Rx Pro is loading settings before Windows startup. Cloud-based OS X backup and restore for Macs If you prefer to use a cloud-based backup and restore solution for your Mac computers, you can use iMy Backup Pro from Blue Galaga Entertainment. It provides reliable backup and restore capabilities and can create bootable backups through Time Machine that you can restore to new Macs to restore your applications and data. You can also use it to create and run scripts that make your Mac bootable. You can get a free 30-day trial, a free version of the app, or subscribe to the full version of the software. All prices start at $39.99 per month, but you can get a 3-year subscription for a price of $59.99. The full version offers you the benefits of sharing the backups with others as well. This software works best on Macs that are compatible with bootable backup using EFI firmware. The software is also compatible with the Mac version of Time Machine.
