Both the individual player and the team-wide experience have been given a significant upgrade. Players were always able to drive their own attacks, but now you can influence them in a variety of ways. You can dictate where your teammate should go, dictate where they should aim, position them in the right area of the pitch, change their run direction, or even turn them on a dime. Plus, when you do, reactions will be more honest than ever, allowing your teammates to see that you knew exactly where they were going and did nothing to help them reach that final position. The better your understanding of their movements, the better you can dictate to them exactly when they need to move and where they need to be. Every time they execute your move correctly, it will reward your team with a bonus, up to five times your average player rating. For example, when you control your teammate correctly to make him choose between going left or going right, you'll earn a 2-point bonus. When you control your teammate correctly to position them in the right area of the pitch, you'll earn a 3-point bonus. And with our new pre-planned actions you will even earn a 5-point bonus for controlling your teammate with finesse, allowing them to make a breakthrough. One of the biggest improvements in FIFA 22, and what has truly made us rethink the controls, is the new "Signature Dribble" system. We are so excited that after extensive testing, we are introducing our signature dribble system to provide even more real-life, player-driven dynamics to gameplay. Using an intuitive combination of the new front and back triggers you can either get behind your defender or leave him stranded with a move of your own design. This new dribble method unlocks the way you play the game. Let your imagination run wild. With the addition of "Signature Dribble" we are setting up the ultimate tool for skillful dribbling and unbelievable trickery. We also wanted to emphasize a key theme of FIFA and football: teamwork. We know that when you play football, often it is the few who go to the wall for the guy who is down on the ground. We wanted to bring the best and most authentic FIFA gameplay to football on the pitch, and the new system allows us to do that. No longer will you be leading an attack with one of your teammates and watching as he goes through on goal. No, now you control
