How do you know for sure? How do you know a 5.1 version of this will work as a software plug-in for a determined version of HAME? How? I have a newer version of HAME 3.5 P4 and that works great, already. But cga 5.1 won't work. I would love to have the cga 5.1 version of the software plug-in for HAME. Reply - Share Hide Replies ^ Grillini - 1 mar 2013 12.44 I bought it in August of 2009 and upgraded to Win 7 Home Premium in November of 2009. All apps function as expected, with the exception of cga 3.5 which I use for guitar audio recording. Reply - Share Hide Replies ^ biphys 2013 Hey is anyone with an ATI computer who's current drivers are 5.1.0.2 please let me know if it's working for you and if so what model card do you have? A number of us were able to download the cga 3.5 patch for Solidworks - it seemed to fix the issue for most of us, but unfortunately for some of us it didn't seem to work at all - we were left with solidworks 2013 error 982... Hello I have a W7 x64 - it installed with no problems. I downloaded the.exe file and tried to install. I was met with a message, saying, "there are problems with this installation. The program files" are either not marked as trusted, or this version of the program is not recommended for your computer. For some reason I can not find the installer. From the W10 download page I do not see the "installer" app. Is there a different way to install this? Or, will this not work for me? Thanks for any help with this. I tried to run the realhack tool after installing the free version of realhack and after I launch it, it cannot be used properly. If I open the 648931e174
