Alternatively, you can use Adobe Lightroom. Lightroom is a photography software aimed at serious amateurs and pros alike. Learn everything about Lightroom and Photoshop in the article below: What is Photoshop? It is the de facto standard in graphics editing and photo retouching and is largely used by professional and hobbyist photographers, graphic designers, web designers, and other people in the creative industry. Photoshop is a piece of free software available for macOS, Windows, iOS, Android and macOS Catalina (10.15). Photoshop comes with robust editing tools, scripting and workflows for photo retouching, web design, graphic art, and illustration. Photoshop is the great choice for hobbyists and professionals. Advertisement Adobe Photoshop is the superior option and the most popular choice for most creative industry professionals, as it has been built for and is widely used by professionals. It does not work in the legal departments of companies, nor can it be purchased in the app stores. It is most often used for high quality edits and is a great tool for anyone from a casual photographer to a professional photo editor. In the following sections, we will discuss some of the very essentials to Photoshop and Photoshop Elements (formerly known as Photoshop Touch) for graphic designers and all other creative professionals. Photoshop Features Here is a list of some of the most powerful features: Clone – You can make multiple copies from an object in Photoshop. Photoshop preserves the original property. The new copies can be used in any of Photoshop versions (Photoshop CC, Photoshop CS, Photoshop CS2, Photoshop CS3, Photoshop CS4, Photoshop CS5, Photoshop CS6, Photoshop CS7, Photoshop CS8). Undo/Redo – An undo tool lets you roll back to a previous state, while a redo tool lets you go forward in your work. Use the tool palette, press Ctrl + Z, or right-click on the image to the right to redo your edits. Create a new document (Ctrl + N) – You can create a new document on the same or a different folder as the original image. Adjustments – You can add or subtract various adjustments to the image. This includes Levels, Curves, Shadows and Highlights. Smoothing – You can smooth the image with various filter presets. Some include Gaussian, Morph, Radial, X-Trans and more.

Archives Investing in Technology June 29, 2016 For many years, we have received payments from selling services to our clients. During this time of transition to a more successful way of investing, it is clear that we are experiencing a shortening time horizon. Keeping the money that we make or have made to invest long-term is becoming more difficult. We have talked about a number of things in the last year that are making it much easier for us to make that transition. In this previous blog "The Shortening Time Horizon," we discussed three things that are making investing more difficult; the zero-balance checking account, the debit card and the recognition that you are a sole trader. All of these things have contributed to reducing the time horizon to invest. We have talked about the zero-balance checking account. This should be a tremendous help and with good management, it should help you enjoy a much more passive way of investing than you ever thought possible. Unfortunately, it is a struggle for many of our clients to get into a position where they can use this device. We spend a lot of time with our clients as they need to understand the benefits of this type of account. The debit card adds yet another layer of complexity and risk. I would not have known a debit card existed until I started my own business. I did not know what I did not know, and many other owners of businesses have experienced the same thing. We talk about a road map for your business, but the road map of your business is important to you and your adviser. I often quote Winston Churchill and other successful people who say: "Success is not final, failure is not fatal; it is the courage to continue that counts." In the vast majority of cases, you will continue to fail until you realize that you are not capable of investing effectively. I recently met with a gentleman and he told me that he had lost over $30,000 in the last year and a half trying to invest. If he had been spending the time on understanding how his business was going to make more money, he would have had no problem raising his cash flow. He decided that he wanted to be a 25% investor and he wanted to have some cash flow to invest. We discussed the importance of a road map and how investing is really a marathon, not a sprint. What this gentleman was trying to do is create money and his difficulty was that he did not
