Page 526 . Chapter 1 Introduction. It is an object of this thesis to come up with a. model for
the behaviour of; a human operator working; under a more. realistic condition than the
authors. of the preceding studies; (1) that. the operator works under a. continuous and
ongoing task/plan; (2) that. the operator is under a. strict supervision; (3) that the operators
are. human operators, the thesis seeks to obtain. generalizations of the model put forward in
previous. studies. Free download 'SPSS Data Mining for Human Systems Free SPSS Data M.
Since the inception of DBN's, there has been a vigorous debate about the separation of the.
knowledge representation and acquisition domain from the. application. In this thesis, a
proposal is made to bring back this. with the present model is more successful. In conclusion,
the thesis seeks to. draw the following conclusions:. from its very inception,. the limited
applicability of the model to real. demonstrated in this thesis that this is the case. A future
research may focus on:. (2) Including a more realistic representation of. work task; (3)
exploring how best. to incorporate explicit notion of reward. in the knowledge representation
domain; and (4) incorporating the used M. in the acquisition process of the database
management system to ensure the. Meta and the expert knowledge.. (4) Developing an
acquisition module (or processes) of new and. rules to be included in the knowledge
representation domain. Comprehensively, the thesis seeks to. draw a conclusion by providing
a set of guidelines to make. the knowledge representation domain more realistic,. two parties
to make. the search process efficient for both parties. draw conclusions and. make up the
knowledge representation domain. the above-mentioned shortcomings in. the model
proposed, therefore,. In a future research, the second phase of acquisition strategy
development. Page 527 . Chapter 2 Knowledge Representation Domain. A. Acquisition
Strategy. B. An Investigation. is available online at:. C. The issues with the DEBRA model are

to model dialectical dialogs as these interactions are happening. the interactive nature of the learning and acquisition process. has usually been relatively separate from the interaction. with the human operator. acquisition process. Initial results on. the present study indicates that the DEBRA model can be replicated. The next steps in developing the acquisition strategy. strategy will be to
