For example, use a blink to get a nice tile to line up, pause and then use a blink to complete the line. The game will continue to tell you what's going on and will even fix any tiles that were messed up. If you continuously activate the gems, they will get really crazy and the combo bar will go down faster. The combo bar can be reset. DON'T GET TOO CRAZY If you get super crazy with gems, then start making more rows of the same type. Doing this will make the screen really crazy with tiles on the screen, but after a couple of seconds you will move on to a different screen where you will be unable to do anything other than make rows of the same type. If you do this, then tap reset in the screen that you are on.
