Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Before I left, though, I found out that I was going to be working on a game development team. My employer would let me look around on a few more days, and then I was going to have to start work. I was pretty excited. I had always wanted to work on game development, and now I had finally had the opportunity. Sure, I could have worked for an established company, but working for a smaller company would help me learn a lot about game development. I logged onto my computer and logged in to the company's forums. There were no threads in the game development section, but there was one for the software team. I clicked the thread and jumped into the discussion. I could usually help people with problems or just discuss things with my peers, and that
