this movie is good but there are some mistakes in the movie some of the scenes are more boring than the others i didn't know what is he taking about and in the end i didn't understand why he did what he did. i would be good if there was a more in depth explanation. i remember when i first saw the movies trailer on youtube and saw the promotional material for everest when it was first announced it looked incredible. i was so excited to see a mountain climbing movie with the ability to use imax! but when i saw the movie for myself it was a let down. the ending had everything that made the movie great but the rest of it was just so bad. i would recommend this movie to a few people but no one should watch it. the movie had a very interesting concept. some people in the movie was so adamant to get to the top of the mountain that it's effect is still in my mind. but the story wasn't good. the story was the most intriguing thing about the movie because it was about the struggle to get to the top of the mountain. the story was very good! the movie was very good! but the ending was a little boring to me. but the effects were very good! but the story was very good! i give it 4 out of 5 stars. aspiring to climb mount everest is a dream for many people, but for those with a life-threatening fear of heights, the journey to the summit is a nightmare. peter boardman first attempted the climb in 1985, and his memories of the experience haunt him until the day he finally reaches the top. in 1996, a young american couple, beck weathers and mike groom, set out to make it to the summit after their dreams were thwarted by weather and mountaineering accidents that claimed a friend and forced beck to leave the expedition. over the next five years, the couple struggles through treacherous conditions and a storm that forces them to abandon their quest to reach the summit.
